MARKETS

JMN SPECIALTIES' original line of specialty solvents and cleaners were developed for use in industrial fabrication and petroleum exploration. As our position in this industry grew, we developed a full range of biodegradable cleaners and other functional products. With these additional lines, our markets expanded dramatically and today include:

- Aircraft deicing and cleaning
- Household, Institutional and Industrial detergents
- Surfactants for emulsion technology
- Environmental products
- Petroleum and related industries
- Corrosion inhibitors
- Metal lubricants
- Soil stabilization and dust control
- Natural and synthetic lubricants
- Dairy cleaners
- EPA and USDA registered products
- Dry cleaning detergents
- Intermediates for chemical manufacturing
- Fuel additives and treatment
- Water treatment
