PRODUCT BULLETIN

ULTRA CLEAN 3000

Concentrated Biodegradable “Tank in a Drum” Cleaner

General Description

ULTRA CLEAN 3000 is a super concentrated, non-toxic, proprietary cleaning system that allows you to maximize the volume of useable product from single drums rather than shipping and storing large tanks of ready to use product. This minimization of inactive ingredients (water) reduces shipping and storage weights by as much as 88% (depending on dilution). One 55 gallon drum contains the equivalent of 550 gallons of finished product. **ULTRA CLEAN 3000** is formulated to save storage space without compromising on quality. **ULTRA CLEAN 3000** is formulated with ingredients listed on the FDA GRAS (generally recognized as safe) list. JMN Specialties, Inc. certifies that this product is formulated and meets the certification requirements of federal regulations (9 CFR, Section 416.4). JMN Specialties, Inc. has documentation on file and this documentation is available to Food Safety and Inspection Service (FSIS) inspection program employees for review. **ULTRA CLEAN 3000** is water based and nonflammable and its composition meets the criteria for not being harmful to the marine environment according to MARPOL Annex I - VI.

First time purchasers of the **ULTRA CLEAN 3000** can request a *start up pack* and will receive, in addition to the cleaner, a 55 gallon drum proportioner that will allow precise metering of the detergent to the exact dilution needed to get the job done quickly and economically.

Simply attach a water hose (60 psi is adequate) and begin dispensing product directly onto the surface to be cleaned, or, fill pails, drums, or totes with ready to use product to be sent to the job site. A PDF file can be emailed to any location allowing the end user to print a label and MSDS to the container for full compliance with all OSHA and DOT regulations. A MSDS (Material Safety Data Sheet) for the concentrated product is attached to every order and can be used to ship dilute product in the event a diluted MSDS is not available. Please obtain the diluted product MSDS use that data sheet for OSHA hazardous communication requirements for the dilute product.

The **ULTRA CLEAN 3000** line of cleaners are field proven formulations that come with our 100% guarantee of satisfaction.

Physical Properties

Color	Dark Purple
Odor	Mild
Specific Gravity	1.01 - 1.04
pH	12.4 - 12.6
Flash Point	None
Water Solubility	100%

Availability

ULTRA CLEAN 3000 is available in UN approved 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
