PRODUCT BULLETIN

MARINE GAS TREATMENT

Fuel Oil Additive

General Description

Marine Gas Treatment is formulated for use in all types of Marine and Off-Highway gasoline engines. Used as directed this product completely dissipates water, cleans fuel injectors and carburetors, prevents corrosion, stabilizes fuel, and typically will raise the fuel octane rating by up as much as 10 points.

When used regularly, **Marine Gas Treatment** will effectively dissipate water, prevent corrosion, help clean the tank, fuel pump, injectors and carburetors. Marine Gas Treatment will stabilize fuel resulting in increased power and will give you better MPG. **Marine Gas Treatment** should be used every time you fuel.

Application

First Application - To Clean: Use 1 gallon of **MGT** to each 750 - 1000 gallons of gasoline. If possible, add to fuel before it is put into storage tanks to assure proper mixing.

Follow-up Application: Use 1 gallon of **MFT** for each 1000 gallons of gasoline.

Availability

Marine Gas Treatment is available in UN approved 5 gallon pails, 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
