## PRODUCT BULLETIN

### FUEL SPEC G

#### All in One Gasoline Additive

##### General Description

**FUEL SPEC G** is formulated to improve fuel efficiency of gasoline powered engines that will, based upon the operators' preference, either reduce fuel consumption or increase power output from their existing engine fleet. **FUEL SPEC G** is formulated with a proprietary lubricant technology will reduce wear and thus extends engine component life resulting in an overall reduction in maintenance expenses. **FUEL SPEC G** will provide a more reliable and smoother running engine fleet. **FUEL SPEC G** reduces exhaust emissions, allowing owners and operators of these engines operators to positively impact the environment and address tightening emissions regulations. **FUEL SPEC G** provides its multifunctional benefits without harmful side effects and without contribution to any emissions or combustion products considered harmful to the environment. Using **FUEL SPEC G** will lower fuel requirements, reduce exhaust gas temperatures, reduce carbon deposits, lower coefficient of friction, and reduce emissions.

**FUEL SPEC G** contains detergents that will reduce intake valve, carburetor, and PFI deposits as well as helping to control combustion chamber deposits. This will improve engine performance and reduce emissions. The fuel stabilizers will reduce gum and varnish in carburetors and fuel system and provides a reduction in oxidation of fuel even when in contact with bronze fittings within the fuel system. **FUEL SPEC G** provides Triple Corrosion Protection against corrosion of steel, copper, and silver metals. **FUEL SPEC G** contains upper cylinder lubricants that provide reduction in piston and piston ring friction in the upper cylinder area of the engine resulting in improved fuel consumption. Additional longer term benefits as the additive accumulates in the crankcase oil will result in reduced wear in critical engine components. **FUEL SPEC G** provides excellent water removal characteristics for Ethanol containing gasoline. **FUEL SPEC G** does NOT contain any alcohol.

##### Use

**FUEL SPEC G** should be added to the tank before filling to assure adequate mixing prior to use. One gallon of **FUEL SPEC G** will treat 1200 – 1400 gallons of gasoline (approximately one ounce per 10 gallons of fuel).

##### Physical Properties

Color	Amber Liquid
Odor	Mild Solvent
Specific Gravity	7.5 - 8.0
Flash Point	~ 108° F
Solubility	Soluble in Hydrocarbons

##### Availability

**FUEL SPEC G** is available in UN approved One gallon containers, 5 gallon pails, 55 gallon drums and bulk quantities.

##### Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
