

## PRODUCT BULLETIN

# ALUM BRITE 385

## Aluminum Cleaner

### General Description

ALUM BRITE 385 is a blend of aggressive acids, detergents and cleaners designed to clean aluminum, stainless steel and fiberglass. ALUMBRITE 385's unique detergent action is strong enough to remove embedded carbon deposits. ALUM BRITE 385 is very effective for cleaning and etching aluminum prior to painting, attaching labels or decals, or reflective or rubber coatings.

### Application

Use ALUM BRITE 385 as provided, or dilute in ratios of 1 : 3 to 1 : 7 in water depending on surfaces to be cleaned. ALUM BRITE 385 can be applied with a brush or sprayer on wet surfaces. Apply from the bottom and work up allowing two to five minutes for penetration of the deposits. Rinse well with water while brushing in order to get a brighter surface. For fiberglass, use the dilution ratio in water that is most effective. Spray or brush onto surface, brush off deposits and rinse.

### Physical Properties

|                  |                   |
|------------------|-------------------|
| Color            | Water-white       |
| Odor             | Acid              |
| Water Solubility | 100%              |
| Density          | 9.75 lbs./gallon  |
| Freeze Point     | 28 <del>B</del> F |

### Availability

ALUM BRITE 385 is available in UN approved 5 gallon pails, 55 gallon drums and bulk quantities.

### Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
