## PRODUCT BULLETIN

### ODORTEK 85933

#### Odor Control Solution

##### General Description

**ODORTEK 85933** is an environmentally safe, concentrated liquid malodor eliminator and neutralizer used for industrial based odors consisting of sulfides, mercaptans, amines, styrene, ammonia, fuel oils or other strong industrial malodors. **ODORTEK 85933** is especially effective in high pH ranges such as found in spent caustic tank cleaning.

##### Application

**ODORTEK 85933** can be batch treated into the liquid malodor source or atomized and/or sprayed into the atmosphere for complete neutralization of emissions. Due to varying concentrations in liquids, titration of solutions with **ODORTEK 85933** is recommended to get precise treating ratios. Generally 1oz. per gallon of liquid is sufficient to neutralize liquids. For air borne applications, 1-2 oz. per gallon of water dilution is recommended. For extremely odorous conditions, **ODORTEK 85933** can be used as provided or diluted to effective concentration with water and applied via soak or atomizing spray. For fuel oils, testing must be done to determine the exact levels of **ODORTEK 85933** needed to sufficiently mask the odor.

**JMN Specialties, Inc.** has atomization equipment for airborne applications.

##### Physical Properties

Odor	Mild Fruit
Solubility	Dispersible in water
Specific Gravity in H <sub>2</sub> O	1.01
pH	7.0
Freezing Point	32° F
Boiling Point	212° F
Flash Point	Non-Flammable

##### Availability

**ODORTEK 85933** is available in UN approved 5 gallon, 6 gallon pails, 20 gallon, 30 gallon and 55 gallon drum quantities.

##### Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
