PRODUCT BULLETIN

CTW 70

Concrete Truck Wash / Hardened Concrete Remover

General Description

CTW-70 is an aqueous blend sugar acids and detergents designed to rapidly clean concrete or masonry products from painted or unpainted metal surfaces. **CTW-70** contains corrosion inhibitors to minimize the attack of the acid on metal, chrome, and aluminum surfaces. **CTW-70** is formulated to work quickly and effectively, thus minimizing the amount of time the product is in contact with sensitive surfaces. **CTW 70** is phosphate free, biodegradable and contains < 2% VOCs.

Application

CTW-70 should be used as provided for hardened concrete removal and diluted 5:1 with water for concrete truck cleaning. For hardened concrete, apply product full strength using a sprayer or brush and allow 5 – 10 minutes penetration time. Expect to see the concrete begin to soften to putty like consistency. The concrete can be removed by brushing or pressure washing. Repeat if needed. For routine cleaning of concrete trucks, dilute **CTW-70** 1:1 to no more than 5:1 with clean water, pre-wet surface to be cleaned, spray product on and allow adequate time for penetration of soils, scrub or pressure wash as needed, rinse thoroughly with clean water. On vertical surfaces, apply product to wet surface from bottom to top to avoid streaking.

Physical Properties

Color	Clear to light amber
Specific Gravity	1.05 - 1.06
pH	1.0 - 3.0
Solubility in Water	100%

Availability

CTW-70 is available in UN approved 5 gallon pails, 55 gallon drums and bulk tanks.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
