PRODUCT BULLETIN

(MIL) A-A-59260 (Superseding MIL-C-14460C) Corrosion Removing Compound, Sodium Hydroxide Base; For Electrolytic or Immersion Application

General Description

This commercial item description (**A-A-59260**) covers one type of alkaline corrosion removal compound suitable for rust removal by simple immersion of the article or by electrolytic action without causing material change in the dimensional characteristics of the treated article.

The product is non-fuming in dry or solution form. **A-A-59260** is effective at ambient temperatures and is even more effective when heated.

Application

A-A-59260 is excellent for cleaning engine parts, stripping paint from metal surfaces and for de-rusting ferrous metal.

Normal starting concentration of **A-A-59260** is 1 to 2 pounds of **A-A-59260** per gallon of water in the vat dip container.

Physical Properties

Specific Gravity	2.125
Appearance	White Crystalline Powder
pH of 1% Solution	13.8

Availability

A-A-59260 is available in UN approved 50 pound pails and 450 / 500 pound drums.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
