PRODUCT BULLETIN

ALUM BRITE 601P

Powdered Aluminum Deoxidizer / Desmutter

General Description

ALUM BRITE 601P is a chromate free powdered product formulated for use in processes known as desmutting and deoxidizing. Desmutting removes the dark, powdery material (smut) that can form on aluminum surfaces during cleaning or etching. Deoxidizing removes the thin layer of aluminum oxide that naturally forms on the surface. **ALUM BRITE 601P** is a powerful, acidic blend that can be used to dissolve oxides and other contaminants from aluminum surfaces. In addition to aluminum, **ALUM BRITE 601P** is safe for use on mild steel, acrylic plastic and paints when used as directed.

Application

When using automated cleaning equipment, **ALUM BRITE 601P** should be used as provided following equipment manufacture's guidelines. To manually clean for desmutting after brightening aluminum trailers, add 2 - 8oz per gallon of water. Apply cleaning solution from the bottom up, agitate surface if needed and rinse immediately with clean water. For heavy smut removal, use 8 – 20oz per gallon of water. **ALUM BRITE 601P** can be used in dip tanks at 8 – 20oz per gallon of water.

Physical Properties

Appearance	White powder with brown specks
Freezing Point	NA
Flash Point	Non-flammable
Solubility in Water	Complete
pH	0 – 3 in water
Specific Gravity	0.89 – 0.91

Availability

ALUM BRITE 601P 3 is available in UN approved screw top 5-gallon pails, and open head 55-gallon drums.

Handling

Observe warning labels on containers. Normal precautions for industrial chemicals apply. This document does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this product to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.
