PRODUCT BULLETIN

BLUE RIG WASH DEGREASER

Biodegradable Heavy-Duty Cleaner

General Description

BLUE RIG WASH DEGREASER is a water-based, super biodegradable blend of detergents, solubilizers, chelators, penetrants, and builders designed for general cleaning of all surfaces that are not damaged by water. **BLUE RIG WASH DEGREASER** uses a unique combination of high performance surfactants to provide effective cleaning for all of the types of soils normally found on offshore drilling and production platforms, in engine rooms, and tank and pipe line cleaning. Depending upon the degree of its dilution with water, **BLUE RIG WASH DEGREASER** is an excellent cleaner and oil-emulsifying degreaser. It is ideally suited for degassing and decontamination barges, ships, tanks, vats, and marine engine room maintenance. With a pH below 12.5, **BLUE RIG WASH DEGREASER** is less likely to cause eye and skin irritation that is normally associated with cleaners with a pH over 12.5.

Application

BLUE RIG WASH DEGREASER may be applied with a rag, sponge, mop or sprayed with a pressure sprayer. Allow a few minutes for the solution to penetrate the soiled surfaces then hose off with water. For best results, do not allow the cleaning solution to dry on the surface before hosing or washing off.

Dilution

BLUE RIG WASH DEGREASER is highly concentrated; for best results dilute with water. For engines and equipment heavily coated with oil or grease, use as provided or use 1 part cleaner to 1 part water. For fresh oil spills and daily clean-up; use 1 part cleaner to 5 parts water. For light cleaning use 5 - 10 ounces cleaner to 1 gallon of water.

Physical Properties

Color	Blue
Odor	Mild
Specific Gravity	1.01 - 1.03
Density	8.565 lbs./gallon
Flash Point	None
pH	< 12.5
Solubility	Water Soluble

Availability

BLUE RIG WASH DEGREASER is available in UN approved 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply. This document does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this product to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.
