

PRODUCT BULLETIN

ACID WINDOW CLEANER

Water Scale Remover

General Description

ACID WINDOW CLEANER is a blend of aggressive acids, detergents and cleaners designed to clean aluminum, stainless steel, and fiberglass. A synergistic blend of organic and inorganic acids functions to effectively dissolve and remove even thick water scales. A unique detergent action is strong enough to remove carbon deposits. **ACID WINDOW CLEANER** contains Ammonium Bifluoride.

Application

Use as provided or dilute **ACID WINDOW CLEANER** in ratios of 1 : 5 or 1 : 10 in water depending on surfaces to be cleaned. **ACID WINDOW CLEANER** can be applied with a brush or sprayer on wet surfaces. Apply from the bottom and work up allowing two to five minutes for penetration of the deposits. Rinse well with water while brushing in order to get a brighter surface. For fiberglass, use 1 : 10 ratio with water, spray or brush onto surface, brush off deposits and rinse. **ACID WINDOW CLEANER** should be applied and removed promptly from glass surfaces to minimize the possibility of the acids etching the surface.

Physical Properties

Color	Red
Odor	Acid
Water Solubility	100%
Density	9.15 lbs./gallon
Freeze Point	28B F

Availability

ACID WINDOW CLEANER is available in UN approved 5 gallon pails, 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply. Extreme care should be used when handling this product. Use proper personal protection as per MSDS.
