

PRODUCT BULLETIN

CHEMICAL PAINT REMOVER-120

Paint Abatement

General Description

CPR-120 is an extremely powerful, non-flammable paint stripper formulated to effectively remove several layers of lead-based paints with one application. Depending on the number of paint layers, expect to get 50-75 square foot per gallon coverage. **CPR-120** works by *dissolving* the paint. The removal process will start as soon as the product is applied and can be left on for several hours without drying out. **CPR-120** *does not* contain Methylene Chloride.

CPR-120 will not damage metal, wood or plaster surfaces.

Application

CPR-120 is formulated to be used as is. Apply **CPR-120** $\frac{1}{8}$ " thick for multiple layers of paint and $\frac{1}{16}$ " for single layers. The removal process will begin as soon as the **CPR-120** touches the paint. Single coats will remove in 30 to 60 minutes, multiple coats may take several hours.

Physical Properties

Color	Light Amber
Appearance	Gel
Odor	Mild
Specific Gravity	1.15
pH, as is	Neutral
Freeze Point	< 32° F

Availability

CPR-120 is available in UN approved 5 gallon pails, 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply. Follow approved lead paint disposal methods.
