PRODUCT BULLETIN

DEFOAM FM-A7

Defoamer for Process, Concrete Pumping, and Drilling Activities

General Description

DEFOAM FM-A7 is a special organic defoamer formulated to reduce air in slurries and other aqueous processes. The use of **DEFOAM FM-A7** can effectively reduce problems with air, such as low densities, surface foaming, and defects caused by bubbles.

Application

DEFOAM FM-A7 is readily soluble in water and typically less than 0.10% of **DEFOAM FM-A7** will be sufficient to eliminate problems from foaming. Lower additions are likely, but should be determined with each specific application. Metering is recommended to prevent over treatment. Consult with **JMN Specialties, Inc.** engineers for specific recommendations.

Physical Properties

Color	Slightly hazy light yellow liquid
Specific Gravity 60°F	0.976 - 0.996
Solubility	Unstable dispersion
Color, Gardner Unit	5 max
Flash Point	None

Availability

DEFOAM FM-A7 is available in UN approved 5 gallon pails and 55 gallon drums.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
