PRODUCT BULLETIN

DG-357M

Heavy-Duty Cleaner

General Description

DG-357 M (Magnum) is a water-based blend of nonionic detergents, solubilizers, chelators, penetrants and alkaline builders designed for general cleaning of all surfaces not affected by water. Depending upon the degree of its dilution with water, **DG-357** is an excellent cleaner and oil emulsifying degreaser. **DG-357** is ideal for degassing and decontaminating barges, ships, tanks, vats and for marine engine room maintenance.

Application

DG-357 may be applied with a rag, mop, sponge or sprayed with a pressure sprayer. Allow a few minutes for the solution to penetrate the soiled surface, then hose off with water. For best results, do not allow the cleaning solution to dry on the surface before washing off.

DG-357 is highly concentrated; for best results, dilute with water.

For engines and equipment heavily coated with oil/grease: use 1 part **DG-357** to 2 parts water.

For fresh oil spills and daily clean-up: use 1 part **DG-357** to 5 parts water.

For light cleaning; use 1 part **DG-357** to 10 parts water.

For floors and walls; use 2-4 ounces of **DG-357** to 1 gallon water.

Physical Properties

Color	Clear
Odor	Mild
Density	8.56 lbs./gallon
Specific Gravity	1.030
pH	12.5 - 13.5
Flash Point	None
Water Solubility	100%

Availability

DG-357 is available in UN approved 5 gallon pails, 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
