

PRODUCT BULLETIN

ENVIROSPEC 550

Spotting Fluid

General Description

ENVIROTEK 550 is a high solids, surfactant based, oil soluble additive for spotting fluids. It effectively increases the soaking rate of spotting oil and at the same time causes dehydration of the wall cake. As the cake dehydrates, it becomes noncohesive and allows penetration of the spotting fluid and wetting of the drill pipe. The force necessary to free the pipe is therefore greatly reduced.

Application

One gallon of **ENVIROTEK 550** per barrel of spotting fluid for weighted and un-weighted drilling fluid.

Physical Properties

Viscosity	10
Specific Gravity	7.0 - 7.5
pH, 5% aqueous dispersion	6.0 - 7.0
Pour Point	18° F
Flash Point	100° F

Availability

ENVIROTEK 550 is available in UN approved 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
