

PRODUCT BULLETIN

ORANGE NE DEGREASER

Solvent Degreaser

General Description

ORANGE NE DEGREASER is a safe, non-water soluble, solvent cleaner, designed for the removal of heavy contamination in tank cleaning, petrochemical and marine industries. ORANGE NE DEGREASER has a wide range of applications due to the high KB value and its ability to “split” oils from water solutions. ORANGE NE DEGREASER is effective in cleaning petroleum grease, tar, asphalt, and any type of oily soil. ORANGE NE DEGREASER is formulated with biodegradable citrus oils and will penetrate and dissolve hard, compacted tars to facilitate easy removal.

Application

ORANGE NE DEGREASER should be used as provided or diluted with a aliphatic solvent (diesel, kerosene, etc.) to desired concentration. For dried tars and asphalt contamination, ORANGE NE DEGREASER should be used as provided. ORANGE NE DEGREASER can be sprayed, brushed, mopped or wiped on contamination. Allow ample time to penetrate soils, and then flush off with fresh water. ORANGE NE DEGREASER can be used in closed circulation solvent cleaning systems, vapor degreasing, and soak cleaning applications.

Physical Properties

Form	Clear to Light Amber liquid
Odor	Citrus
Specific Gravity	0.83 - 0.85
pH	Slightly Acidic
Flash Point	120 - 130 ^b F

Availability

ORANGE NE DEGREASER is available in UN approved 5 gallon pails, 30 & 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
