PRODUCT BULLETIN

PHOSTREAT

Rust and Stain Remover/Metal Conditioner

General Description

PHOSTREAT is a fast acting, acid type compound that neutralizes alkaline residue. It not only rapidly removes rust and stops rust action, but it will change rust (iron oxide) into iron phosphate, an inert, hard, usually gray surface that provides a perfect base for most paints.

PHOSTREAT is effective for rust and stain removing, as a neutralizing rinse for ships' sides, machinery spaces, decks, ship equipment, bulkheads, bilges, oil field rigs, platforms and equipment.

Application

For rust and stain removal; dilute 1 to 2 with fresh water for heavy stains; 1 to 5 for normal stains. Apply directly as wipe, brush or spray. Dries fast without streaking. Neutralizing rinse: after washing metal surfaces with general purpose cleaner, metal must be neutralized before painting. Apply 2 - 4% solution of **PHOSTREAT** by either spray or flood rinsing.

Physical Properties

| | |
|------------------|-----------------|
| Color | Clear Green |
| Odor | Typical Acid |
| Water Solubility | 100% |
| Density | 9.8 lbs./gallon |
| Freeze Point | 28° F |

Availability

PHOSTREAT is available in UN approved 5 gallon pails, 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
