## PRODUCT BULLETIN

### RUST GEL

#### Rust Converter/Stain Remover

##### General Description

**RUST GEL** is a superior fast acting, acid type compound that neutralizes and converts rust from iron-oxide into iron phosphate, an inert, hard, usually gray surface that provides a perfect base for most paints.

**RUST GEL** is excellent as a rust stain remover for stainless steel and yellow metals.

**RUST GEL** is a thick viscous liquid that clings in place once applied to surfaces.

##### Application

**RUST GEL** should be applied as received . Complete application methods follow.

1. Brush away or chip off loose rust and scale.
2. Brush or spray **RUST GEL** onto metal and allow 1-8 hours for complete phosphotizing/ passivation process.
3. Wash with water and allow to dry between painting.

To remove rust stains, brush on **RUST GEL**, agitate surface and spray off with water.

##### Availability

**RUST GEL** is available in six by one cases, UN approved 5 gallon pails and 55 gallon drums.

##### Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
