PRODUCT BULLETIN

RUSTTEK DS

Rust Treatment / De-scaler

General Description

RUSTTEK DS is a fast acting, acid type compound formulated as a rust remover and descaler to be applied to bare and painted ferrous metal surfaces. When applied in accordance with directions, **RUSTTEK DS** quickly removes the heaviest scale in preparation of painting and coating operations. Utilizing special self passivating acids and inhibitors, **RUSTTEK DS** will not adversely affect the base ferrous metal.

Application

For effective removal of rust, rust stains and scale, the surface should be free of heavy oil and grease. Once surfaces are clean, **RUSTTEK DS** may be applied at ratios of 1:1 to 1:10 depending on the severity of the rust and scale. For heavy stains, use **RUSTTEK DS** as received.

Physical Properties

Color	Clear to light amber
Odor	Typical Acid
Water Solubility	100%
Density	9.01 lbs./gallon
Freeze Point	28BF

Availability

RUSTTEK DS is available in UN approved 5 gallon pails, 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
