

PRODUCT BULLETIN

SOIL TRAP

Penetrating Soil Encapsulant

General Description

SOIL TRAP is a non-toxic, multi-purpose, ready-to-use, airless spray applied wetting and penetrating encapsulant for all forms of friable asbestos that may be contained in crawl ways, dirt or sand. **SOIL TRAP** allows for efficient, safe and efficient removal and handling of ACM (Asbestos Containing Material). **SOIL TRAP** securely adheres to and *binds* friable ACM to surrounding material. **SOIL TRAP's** unique surfactant properties will quickly penetrate and encapsulate asbestos fibers for removal. When dry, **SOIL TRAP** forms a clear, non-abrasive, flexible film for safe and effective handling of ACM. **SOIL TRAP** can be diluted up to 4 to 1 when used as a removal wetting agent and removal encapsulant making it the most economical removal encapsulant on the market today. **SOIL TRAP** is an effective lock-down encapsulant when misted over the work area to bind any remaining asbestos fibers to the substrate. **SOIL TRAP** is available in various tints.

Application

SOIL TRAP may be applied with a piston type airless sprayer, hand pump-up garden sprayers or poured directly on the ACM. Depending on the density of the ACM, **SOIL TRAP** will cover approximately 50 to 55 square feet at one inch penetration.

Physical Properties

Color	Clear (or various tinted colors)
Odor	Slight Ammonia
Specific Gravity	9.92
Solids Content	36%
pH	< 10
Flash Point	None
Solubility	Dilutable in Water

Availability

SOIL TRAP is available in UN approved 5 gallon pails, 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
