PRODUCT BULLETIN

SPECSOL 8150

Solvent Cleaner

General Description

SPECSOL 8150 is a combination of aliphatic, aromatic and natural organic oils specially formulated to be used in degreasing and chemical processes.

SPECSOL 8150 proprietary solvent blend greatly accelerates the penetration of the cleaner into soils and allows for fast and effective removal of oily residues, tars, paraffin, and other hydrocarbon contamination. **SPECSOL 8150** does not contain surfactants or other emulsification agents. This feature allows the spent cleaning solution to be processed downstream, or if contaminated with water, will quickly and effectively separate from water streams.

Application

SPECSOL 8150 is excellent as a pipe thread cleaner, degreaser in closed circulation systems or a bulk degreaser in cleaning process vessels. **SPECSOL 8150** is very effective for cleaning asphaltine type contamination.

Physical Properties

Color	Clear to Light Amber
Odor	Mild Solvent
Specific Gravity	.925
Flash Point	> 100° F
Boiling Point	IBP 290° F - 330° F

Availability

SPECSOL 8150 is available in UN approved 5 gallon pails, 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
