## PRODUCT BULLETIN

### TEKCURE 1280

#### Salt Eliminator / Corrosion Inhibitor

##### General Description

**TEKCURE-1280** is a water soluble chloride remover / flash rust inhibitor that is non-hazardous and is environmentally acceptable for most applications where over spray or runoff may occur. **TEKCURE-1280** is formulated for use on metal surfaces such as tubular goods, tools or marine equipment exposed to salt water, high brine, completion fluids or other corrosive related environments. **TEKCURE-1280** does not “treat” or “convert” salts, it removes them completely.

##### Application

**TEKCURE-1280** is typically diluted with potable water and used in high pressure sprayers. It can also be sprayed, brushed, mopped or used in vat dipping applications to prevent flash rusting. Surfaces to be inhibited must be degreased and essentially be free of any protective film.

**TEKCURE-1280** imparts a tough protective barrier making it suitable for short time outdoor storage. **TEKCURE-1280** is excellent as an internal pipe corrosion inhibitor.

##### Physical Properties

Flash Point	Non-flammable
Freeze Point	32° F
pH	< 12
Specific Gravity	1.02
Color	Deep Blue

##### Availability

**TEKCURE-1280** is available in UN approved one gallon pails, 5 gallon pails, 55 gallon drums and bulk quantities.

##### Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
