PRODUCT BULLETIN

TEKCUT 50

Metal Working Lubricant

General Description

Tekcut 50 is a soluble oil concentrate specially designed to be a general purpose, multi-functional fluid for most ferrous and non ferrous materials and operations as diverse as cylindrical grinding, ID broaching and gear hobbing. **Tekcut 50** provides extended sump life while reducing carry off and leaves a fluid oily residue to prevent sticky ways and chunks. It is effective in some types of screw machines as a replacement for straight cutting oil and has EP additives to reduce chip welding and mechanical lubricity for good performance on soft gummy materials.

Application

Always add **Tekcut 50** concentrate to the water with continuous stirring. NEVER THE REVERSE. Do not premix richer than 3 parts water to 1 part **Tekcut 50** concentrate (3:1). Premixing the initial charge and/or makeup solution outside of the machine sump is recommended. Do not add **Tekcut 50** concentrate directly to the working solution in the machine tool.

<i>Light Duty Machining & Grinding:</i>	5%
<i>Moderate Duty Machining:</i>	5%-7%
<i>Heavy-Duty Machining:</i>	7%-10%
<i>Very Heavy-duty Machining:</i>	10%-20%
<i>Design Concentration Range:</i>	5%-20%

Physical Properties

Color	Greenish Liquid
Odor	Mild Solvent
Specific Gravity	.926
pH	9 - 10
Flash Point	> 300/ F
Boiling Point	> 250/ F
Freezing Point	< 32/ F

Availability

Tekcut 50 is available in UN approved 5 gallon pails, 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
