PRODUCT BULLETIN

TEKHIB WC

Parts Protector/Corrosion Inhibitor

General Description

TEKHIB WC is an outstanding water displacing, non-staining rust preventative which will rapidly separate water displaced from metal surfaces after machining operations or after alkali cleaning. Ultra thin, highly protective films are applied to unpainted or painted surfaces with **TEKHIB WC**. These ultra thin, highly protective films are effective in the protection of ferrous and non-ferrous metals from atmospheric corrosion even under conditions of high humidity, both fresh or salt mists. Materials protected with **TEKHIB WC** are protected indefinitely for inside storage even under extreme conditions.

Application

Normal spray or dip applications of **TEKHIB WC** will result in adequate mil thickness to provide normal levels of protection. Any number of applications may be applied by allowing the prior coat to dry. Infinite indoor protection is obtained at 0.1 mils DFT (Dry Film Thickness). Severe outdoor conditions may require 2 - 6 mils DFT.

Physical Properties

Appearance	Tan to Brown Liquid
Odor	Solvent
Specific Gravity	0.84 - 0.86
Flash Point	~ 145° F

Availability

TEKHIB WC is available in UN approved 5 gallon pails, 55 gallon drums and bulk quantities.

Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
