

## PRODUCT BULLETIN

# ALKALINE CONCRETE CLEANER

## Heavy-Duty Concrete Cleaner

### General Description

**ALKALINE CONCRETE CLEANER** is a specialized, heavy alkaline, liquid cleaning formula specifically designed to remove burned oil, carbon black, tars and residues, heavy grease lube and transmission oil from concrete surfaces. **ALKALINE CONCRETE CLEANER** was formulated specifically for use on concrete and hard, non-painted surfaces. **ALKALINE CONCRETE CLEANER** penetrates and dissolves residues. This powerful compound may be harmful to most paints and aluminum.

### Application

**ALKALINE CONCRETE CLEANER** is applied most effectively by a pressure sprayer (garden type), but may be brushed or poured onto the surface. Allow a few minutes for penetration, then hose off with water pressure. Extremely heavy deposits may require two or more hours for penetration before hosing.

### Physical Properties

Color	Purple
Odor	Mild
Density	8.6 lbs./gallon
pH	13.8
Flash Point	Not Flammable

### Dilutions

For heavy cleaning, **ALKALINE CONCRETE CLEANER** should be applied undiluted. For other applications not requiring full strength, dilute with clean water. Dilutions may vary from 1 : 1 to as much as 1 : 8 depending on the surface condition.

### Availability

**ALKALINE CONCRETE CLEANER** is available in UN approved 55 gallon drums and bulk quantities.

### Handling

Observe warning labels on containers. Normal precautions for industrial chemicals apply. Product freezes at temperatures below 50°F. If product freezes, warm to room temperature (above 70 F) and mix until uniform. Avoid contact with product to unprotected skin or eyes. Read MSDS for proper safety and handling directions.
