## PRODUCT BULLETIN

### NO-RUST 2

#### Rust/Metal Treatment

#### Compiles with Mil-Spec C-10578D Type 2

##### General Description

**NO-RUST 2** is a fast-acting, acid-type compound that neutralizes alkaline residues. Through chemical action, **NO-RUST 2** changes rust (iron oxide) into iron phosphate, an inert, hard, usually gray surface that provides a perfect base for most paints.

##### Application

**NO-RUST 2** is an excellent metal treatment and rust remover, as well as a good brightener for copper, brass and aluminum. Rusty metal or new metal treated with **NO-RUST 2** provide a tenacious phosphate-film on the metal as an unexcelled base for most paints.

Brush away or chip-off loose rust and scale.

Brush or spray **NO-RUST 2** on metal. Allow 1 to 8 hours for complete chemical reaction. (Time will vary depending on the condition of the metal surface.)

Repeat if any rust remains untreated. Allow to dry between painting.

##### Availability

**NO-RUST 2** is available in UN approved 5 gallon pails and 55 gallon drums.

##### Handling

Observe warning label on containers. Normal precautions for industrial chemicals apply.
