

Safety Data Sheet (PHOSTEK DR)

1 – PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME:PHOSTEK DR

CHEMICAL NAME/

CLASS/SYNONYMS:Acid Cleaner, Rust Converter, Chemical Primer

PRODUCT NUMBER:PHOSTEK DR

UN/NA NUMBER:1805

CHEMICAL FAMILY:Acid, Inorganic

CAS NUMBER:7664-38-4

FORMULA: Mixture

COMPANY:JMN Specialties, Inc.

1100 Victory Drive – Westwego, Louisiana USA 70094

Phone (504) 341-3749, Fax (504) 341-5868

www.jmnspecialties.com

EMERGENCY PHONE:CALL CHEMTEL: Toll Free US & Canada: (800) 255-3924, Outside
USA +01-813-248-0585.

DATE PREPARED:January 18, 2021

2 – HAZARDS IDENTIFICATION

GHS HAZARD CLASSIFICATION:

Physical Hazards

Flammable Liquids:No Hazard Statement established for this Product

Corrosive Liquids:May be corrosive to metals

Health Hazards

Acute Toxicity (Oral):Category 4 - Harmful if swallowed, in contact with skin, inhaled

Skin Corrosion/Irritation:Category 1B - Causes severe skin burns and eye damage

Eye Damage/Irritation:Category 1 - Causes severe eye damage

Aspiration Hazard:Category 1 - May be fatal if swallowed and enters airways

Carcinogen:No Hazard Statement established for this Product

See Section 11 for additional Toxicological information

EMERGENCY OVERVIEW:

Pictograms:

Signal Word (GHS-US):**DANGER!**

Safety Data Sheet (PHOSTEK DR)

Hazard Statements:

Physical Hazards (GHS-US):

H290: May be corrosive to metals

Health Hazards (GHS-US):

H314: Causes severe skin burns and eye damage. H318: Causes serious eye damage.

Environmental Hazards (GHS-US):

No Hazard Statement established for this Product.

Precautionary Statements (GHS-US):

P101+P102+P103: If medical advice is needed, have product container or label at hand. Keep out of the reach of children. Read label before use.

P202+P233+P270+P280+P281: Do not handle until all safety precautions have been read and understood. Keep container tightly closed. Do not eat, drink or smoke when using this product.

Wear protective gloves/protective clothing/eye protection/face protection. Use personal protective equipment as required. P264: Wash thoroughly after handling.

P234+P264: Keep only in original container. Wash skin thoroughly after handling.

P233+P403+P405: Keep container tightly closed. Store in a well ventilated place. Store locked up.

Response Statements (GHS-US):

P301+P330+P331 IF SWALLOWED: Rinse mouth. Do not induce vomiting. P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with

water/shower. P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing. P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes.

Remove contact lenses, if present and easy to do. Continue rinsing. P310: Immediately call a POISON CENTER/doctor/physician. P363: Wash contaminated clothing before reuse. P390:

Absorb spillage to prevent material-damage. P405: Store locked up. P406: Store in corrosive resistant container with a resistant inner liner.

P501: Dispose of contents/container: Treatment, storage, transportation and disposal must be in accordance with Federal, State/Provincial and Local Regulations, and product characteristics at time of disposal.

TOTAL VOC's:.....< 6%

3 – COMPOSITION / INFORMATION ON INGREDIENTS

| HAZARDOUS INGREDIENT | PERCENT* | CAS NUMBER |
|---------------------------------------|----------|-------------|
| Phosphoric Acid | 45 - 60 | 7664-38-2 |
| 2-butoxyethanol | 5 - 10 | 111-76-2 |
| Nonylphenol polyethylene glycol ether | 1 - 5 | 127087-87-0 |

*Any concentration shown as a range is to protect confidentiality or is due to batch variation.

Safety Data Sheet (PHOSTEK DR)

4 – FIRST-AID MEASURES

- BREATHING (INHALATION):**..... Remove from exposure area to fresh air immediately. If breathing has stopped, perform artificial resuscitation. Keep person warm and at rest. Treat symptomatically and supportively. Seek medical attention immediately. Qualified medical personnel should consider administering oxygen.
- SWALLOWING (INGESTION):**..... Give large amounts of fresh water or milk immediately. Do not give anything by mouth if person is unconscious or otherwise unable to swallow. If vomiting occurs, keep head below hips to prevent aspiration. Treat symptomatically and supportively. Seek medical attention immediately.
- EYES:** Flush eye with copious quantities of water. If persistent irritation occurs, obtain medical attention. If liquid phosphoric acid or solutions containing phosphoric acid get into the eyes, flush eyes immediately with a directed stream of water for at least 30 minutes while forcibly holding eyelids apart to ensure complete irrigation of all eye and lid tissue. **GET MEDICAL ATTENTION IMMEDIATELY.** Contact lenses should not be worn when working with this chemical.
- SKIN (DERMAL):** Remove contaminated clothing and wash affected skin with soap and water. If persistent irritation occurs, obtain medical attention. When using high pressure equipment, injection of product under the skin can occur. If high pressure injuries occur, the casualty should be sent immediately to a hospital. Do not wait for symptoms to develop.
- NOTE TO PHYSICIAN:** All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.

5 – FIRE-FIGHTING MEASURES

- GENERAL FIRE HAZARDS:** Emergency responders in the danger area should wear bunker gear and self-contained breathing apparatus for fires beyond the incipient stage (29CFR 1910.156). In addition, wear other appropriate protective equipment as conditions warrant (see Section 8). Contact with water may generate heat. Isolate damage area, keep unauthorized personnel out. Stop spill/release if it can be done with minimal risk. Move undamaged containers from danger area if it can be done with minimal risk. Fires involving small amounts of combustibles may be smothered with suitable dry chemicals. Use water on combustibles burning but avoid using water directly on acid as it results in evolution of heat and causes splattering.

Safety Data Sheet (PHOSTEK DR)

AUTOIGNITION TEMP:..... No Data Available

EXTINGUISHING MEDIA:..... Fires involving small amount of combustibles may be smothered with suitable dry chemical, soda ash, lime, sand or CO₂. Use water on combustibles burning in vicinity of this material but use care as water applied directly to this acid result in evolution of heat and causes splattering.

SPECIAL FIRE FIGHTING

PROCEDURES:..... Phosphoric Acid at a high concentration can cause very serious damage upon contact. It burns the cornea and can lead to permanent blindness if splashed onto eyes. Spilled product on ground may be slippery. Accordingly, safety precautions should be strictly observed when handling or cleaning it when spilled as the result of a fire.

UNUSUAL FIRE AND

EXPLOSION HAZARDS:..... Containers may explode from internal pressure if confined to fire. Cool with water spray.

6 – ACCIDENTAL RELEASE MEASURES

SPILL PROCEDURES: Wear appropriate personal protective equipment before approaching spill site. For small spills, dilute with water to sewer if allowed by local and state regulations. If unable to wash product with water, absorb with inert material (sand or other approved material) and dispose of in accordance with applicable regulations.

WASTE DISPOSAL:..... Treatment, storage, transportation and disposal must be in accordance with Federal, State/Provincial and Local Regulations. Regulations may vary in different locations. Characterization and compliance with applicable laws are the responsibility solely of the generator. Whatever cannot be saved for recovery or recycling should be managed in an appropriate and approved waste disposal facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements.

RCRA STATUS:..... If discarded in its purchased form, this product is considered a RCRA hazardous waste. It is the responsibility of the product user to determine at the time of disposal, whether a material containing the product should be classified as a hazardous waste. (40CFR261.20-24).

Safety Data Sheet (PHOSTEK DR)

7 – HANDLING and STORAGE

STORAGE:..... Keep in a tightly closed container, stored in a cool, dry, ventilated area below 44°C (110°F). Protect against physical damage. Isolate from incompatible substances. Containers of this material may be hazardous when empty since they retain product residues (vapors, liquid); observe all warnings and precautions listed for the product. Drum must not be washed out or used for other purposes.

HANDLING:..... Avoid contact with eyes, skin and clothing. Do not inhale vapors and fumes. Wash thoroughly after handling. Use only with adequate ventilation. Do not take internally. For industrial use only.

8 – EXPOSURE CONTROLS / PERSONAL PROTECTION

OCCUPATIONAL EXPOSURE LIMITS

| HAZARDOUS INGREDIENT | PEL | TLV-TWA |
|---------------------------------------|---------------------|---------------------|
| Phosphoric Acid | 2 mg/m ³ | 2-mg/m ³ |
| 2-butoxyethanol | 50 ppm | 50 ppm |
| Nonylphenol polyethylene glycol ether | None Established | None Established |

EXPOSURE CONTROLS:..... Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Please refer to the ACGIH document, *Industrial Ventilation, A Manual of Recommended Practices*, most recent edition, for details.

Safety Data Sheet (PHOSTEK DR)

RESPIRATORY PROTECTION:.....If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. In the United States of America, if respirators are used, a program should be instituted to assure compliance with OSHA Standard 63 FR 1152, January 8, 1998. Respirator type: Air-purifying respirator with an appropriate, government approved (where applicable), air-purifying filter, cartridge or canister. Contact health and safety professional or manufacturer for specific information. Self-Contained Breathing Apparatus may be required for use in confined or enclosed spaces.

PROTECTIVE CLOTHING:..... **Eye/face protection:** Wear chemical goggles; face shield (if splashing is possible). **Skin protection:** Chemical resistant, impermeable gloves. Gloves should be tested to determine suitability for prolonged contact. Use of impervious apron or chemical suit and chemical resistant boots are recommended.

ADDITIONAL MEASURES:.....Avoid contact with the skin and avoid breathing vapors. Do not eat, drink, or smoke in work area. Wash hands before eating, drinking, or using restroom. Do NOT place food, coffee or other drinks in the area where dusting or splashing of solutions is possible. Handle in accordance with good industrial hygiene and safety practice. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Safety shower and eye wash should be available close to work areas.

9 – PHYSICAL / CHEMICAL PROPERTIES

BOILING POINT:..... 212°F (100°C)
FREEZING POINT:..... 28°F (-2.2°C)
FLASHPOINT:Non-flammable
UPPER FLAME LIMIT (%):.....NA
LOWER FLAME LIMIT (%):.....NA
VAPOR PRESSURE:Similar to Water
VAPOR DENSITY (AIR=1):.....> 1 (Air = 1)
SPECIFIC GRAVITY:1.275 - 1.330
pH:< 1
SOLUBILITY IN WATER:.....100%
VOLATILITY
INCLUDING WATER:10.63 - 11.10 pounds per gallon
MOLECULAR WEIGHT:.....No data available (G/MOLE)
EVAPORATION RATE:< 1
PHYSICAL STATE:.....Liquid
COLOR:Clear Light Green
ODOR:Bland, Acidic

Safety Data Sheet (PHOSTEK DR)

10 – STABILITY and REACTIVITY

STABILITY:Stable

HAZARDOUS DECOMP.:Will not occur

INCOMPATIBILITY:Liberates explosive hydrogen gas when reacting with chlorides and stainless steel. Can react violently with sodium tetrahydroborate. Exothermic reactions with aldehydes, amines, amides, alcohols and glycols, azo-compounds, carbamates, esters, caustics, phenols and cresols, ketones, organophosphates, epoxides, explosives, combustible materials, unsaturated halides, and organic peroxides. phosphoric acid forms flammable gases with sulfides, mercaptans, cyanides and aldehydes. It also forms toxic fumes with cyanides, sulfide, fluorides, organic peroxides, and halogenated organics. Mixtures with nitromethane are explosive.

HAZARDOUS REACTIONS:.....Phosphoric Acid may react vigorously, violently or explosively with many organic and inorganic chemicals.

11 – TOXICOLOGICAL INFORMATION

THRESHOLD LIMIT VALUE:.....2 mg/m³

OSHA PEL:.....2 mg/m³

LISTED CARCINOGEN:.....Phosphoric Acid has produced no genetic changes in standard tests using bacterial cells.

MEDICAL CONDITION

AGGRAVATED:.....Overexposure to phosphoric acid mist may cause lung damage and aggravate pulmonary conditions. Contact of phosphoric acid with skin may aggravate diseases such as eczema and contact dermatitis.

INFORMATION ON ACUTE TOXICOLOGICAL EFFECTS

ORAL

Product:Corrosive. Causes serious burns of the mouth or perforation of the esophagus or stomach. May be fatal if swallowed.

DERMAL

Product:Corrosive. Splashes on the skin will cause skin burns. Direct contact can be severely irritating to the skin and may result in redness, swelling, burns and possible severe skin damage.

INHALATION

Product:Corrosive. May be harmful or fatal if inhaled. May cause severe irritation and burns of the nose, throat and respiratory tract.

Safety Data Sheet (PHOSTEK DR)

REPEATED DOSE TOXICITY

Product:Phosphoric Acid has produced no genetic changes in standard tests using bacterial cells. No data on other effects on Humans.

SKIN CORROSION / IRRITATION

Product:The results of single exposure tests indicate that these concentrations of phosphoric acid are slightly toxic after skin application. Following a 24-hour exposure, irreversible eye and skin damage occurred at all tested concentrations of phosphoric acid.

SERIOUS EYE DAMAGE / IRRITATION

Product:Corrosive. Direct contact with the liquid or exposure to vapors or mists may cause stinging, tearing, redness, swelling, corneal damage and irreversible eye damage. Splashes in the eyes will cause severe burns. Contact lenses should not be worn when working with this chemical.

RESPIRATORY OR SKIN SENSITIZATION

Product:Repeated exposure of workers to the mist causes chronic conjunctivitis, tracheobronchitis, stomatitis, and dermatitis.

MUTAGENICITY

IN VITRO

Product:No Data Available

IN VIVO

Product:No Data Available

Specified Substance(s)

Information as provided by manufacturer

Phosphoric Acid

No Data Available

CARCINOGENICITY

Product:NOT a suspected Human carcinogen.

REPRODUCTIVE TOXICITY

Product:Based on the available test, not expected to cause adverse effects on reproduction.

SPECIFIC TARGET ORGAN TOXICITY – SINGLE EXPOSURE

Product:.....The results of single exposure tests indicate that these concentrations of phosphoric acid are slightly toxic orally and no more than slightly toxic after skin application. Following a 24-hour exposure, irreversible eye and skin damage occurred at all tested concentrations of phosphoric acid.

SPECIFIC TARGET ORGAN TOXICITY – REPEATED EXPOSURE

Product:There is sufficient evidence that occupational exposure acid mists may cause an increase in upper respiratory distress. This classification is for inorganic acid mists only and does not apply to phosphoric acid solutions.

ASPIRATION HAZARD

Product:Droplets of the product aspirated into the lungs through ingestion or vomiting may cause chemical pneumonia.

Safety Data Sheet (PHOSTEK DR)

OTHER ADVERSE EFFECTS

Product:To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated. Handle in accordance with good industrial hygiene and safety practice.

12 – ECOLOGICAL INFORMATION

ACUTE TOXICITY

FISH

Product:Acids cause decreased pH values in the water. A low pH value harms aquatic organisms.

AQUATIC INVERTEBRATES

Product:Acids cause decreased pH values in the water. A low pH value harms aquatic organisms.

CHRONIC TOXICITY

FISH

Product:The product is not classified as dangerous for the environment. The product may affect the acidity (pH-factor) in water with risk of harmful effects to aquatic organisms. Evaluate the necessity of neutralization.

AQUATIC INVERTEBRATES

Product:The product is not classified as dangerous for the environment. The product may affect the acidity (pH-factor) in water with risk of harmful effects to aquatic organisms. Evaluate the necessity of neutralization.

TOXICITY TO AQUATIC PLANTS

Product:Acids or acidic products can cause decreased pH values in the water. A low pH value harms aquatic organisms.

PERSISTENCE AND DEGRADABILITY

BIODEGRADATION

Product:No specific biodegradation test data located. While acidity of this material is readily reduced in natural waters, the resulting phosphate may persist indefinitely or incorporate into biological systems.

BIOLOGICAL OXYGEN DEMAND

Product:No data available

CHEMICAL OXYGEN DEMAND

Product:No data available

BOD / COD RATIO

Product:No data available

BIOACCUMULATIVE POTENTIAL

Product:No specific biodegradation test data was located in a search of the available scientific literature. It was reported in the literature that while acidity of this material may be reduced readily in natural waters, the phosphate may persist indefinitely.

Safety Data Sheet (PHOSTEK DR)

MOBILITY IN SOIL

Product:Phosphoric acid (solution) is soluble in water and has high mobility in soil. During transport through the soil, phosphoric acid (solution) may dissolve some of the soil material; in particular, the carbonate based materials. The acid will be neutralised to some degree, however, significant amounts of acid are expected to remain for transport down towards the ground water table. Upon reaching the ground water table, the acid will continue to move, now in the direction of the ground water flow. Lime addition may be required to rectify low pH resulting from phosphoric acid (solution) spillages.

RESULTS OF PBT AND mPvB ASSESSMENT

Product:Not fulfilling PBT (persistent/bioaccumulative/toxic) criteria.
Not fulfilling vPvB (very persistent, very bioaccumulative) criteria.

OTHER ADVERSE EFFECTS

Product:Acids cause decreased pH values in the water. A low pH value harms aquatic organisms. Do not allow to enter into sewer, water system or soil.

13 –DISPOSAL CONSIDERATIONS

WASTE DISPOSAL:.....Treatment, storage, transportation and disposal must be in accordance with Federal, State/Provincial and Local Regulations. Regulations may vary in different locations. Characterization and compliance with applicable laws are the responsibility solely of the generator. Whatever cannot be saved for recovery or recycling should be managed in an appropriate and approved waste disposal facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements.

RCRA STATUS:.....If discarded in its purchased form, this product is considered a RCRA hazardous waste. It is the responsibility of the product user to determine at the time of disposal, whether a material containing the product should be classified as a hazardous waste. (40CFR261.20-24).

Safety Data Sheet (PHOSTEK DR)

14 – TRANSPORTATION INFORMATION

Important Note: Shipping descriptions may vary based on mode of transport, quantities, package size, and/or origin and destination. Consult your company's Hazardous Materials/Dangerous Goods expert for information specific to your situation.

UN/NA NUMBER:.....1805
PROPER SHIPPING NAME:..... Phosphoric Acid Solution
HAZARD CLASS:.....8
PACKAGING GROUP :III
LETTER:.....C (Corrosive substances)
ENVIRONMENTAL HAZARD:Phosphoric acid is, with high probability, not acutely harmful to aquatic life and it does not accumulate in the food chain.
REPORTABLE QUANTITY:.....8174 pounds (3707 kilograms) based on Phosphoric Acid in Blend.

15 - REGULATIONS

This Safety Data Sheet conforms to ANSI Z400.5, and to the format requirements and the International Chemical Safety Cards of the Global Harmonizing System. This SDS complies with 29 CFR 1910.1200 (HAZARD COMMUNICATION STANDARD). **IMPORTANT:** Read this SDS before handling & disposing of this product. Pass this information on to employees, customers, & users of this product.

EPA SRA Title III Chemical Listings:

TSCA STATUS:This product is listed on the TSCA inventory. If this product is a blend, all ingredients in the product are listed on the TSCA Inventory List. Any impurities present in this product are exempt from listing.

SECTION 302:.....PNo chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SECTION 304:.....Phosphoric Acid CAS # 7664-38-2; 5000 pounds (2267.96 kilograms), Threshold Planning Quantity (TPQ)

SECTION 312:.....Yes

SARA SECTION 313:.....This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

ACUTE:Yes

CHRONIC:Yes

FIRE:No

PRESSURE: No

REACTIVE:.....No

Safety Data Sheet (PHOSTEK DR)

CLEAN WATER ACT:.....The following Hazardous Substances are listed under the U.S. CleanWater Act, Section 311, Table 116.4A and Table 117.3:
Phosphoric Acid.

IMDG – International Marine Dangerous Goods Code

UN1805, Phosphoric Acid, Solution, 8, C, PGIII. EmS F-A, S-B. Marine Pollutant: No. Static Accumulator: No.

IATA

UN1805, Phosphoric Acid, Solution, 8, C, PGIII.

DEA Chemical Trafficking Act: ..No

Homeland Security Regulated ..This product does not contain any reportable DHS chemicals.

California Proposition 65.....This product contains the following Proposition 65 chemicals:

Component.....This product does not contain any chemicals known to the State of California to cause cancer, birth, or any other reproductive defects.

Cal Prop 65..... Not Applicable/Not Available

Cal Prop 65 NSRL.....No Significant Risk Level
